# GREENMARKER

## HI-BRIGHTNESS LED LANTERNS

### APPLICATIONS

The Greenmarker LED Lanterns are available in three different sizes namely **Greenmarker/S** of 433mm length which uses 40W and 60W LED lamps. The mid-size lantern of 665mm length is called **Greenmarker/M** which uses 80W, 100W, 120W and 150W LED lamps. The large lantern, **Greenmarker/L** of 865mm length uses 200W and 240W LED lamps.

These aesthetically-appealing and attractive lanterns use superb, long life Philips LED lamps with a high efficiency of 100 lumens/watt.

The Greenmarker lantern is supplied with a well-designed and sturdy mounting arm bracket suitable for both post-top mounting as well as side-mounting to suit different applications.

These lanterns are particularly suitable for use in roadways, open car parks, service roads, building perimeters, security fencings and many other applications.

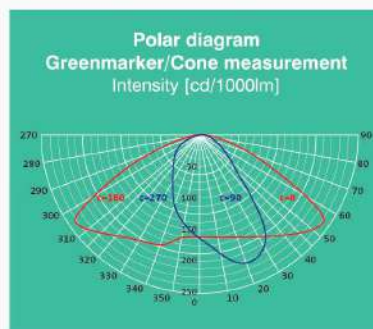

### CONSTRUCTION

The Greenmarker lantern is constructed with high quality die-cast aluminium housing with a clear 4mm-thick heat-resistant, tempered glass cover.

The control gear (driver) is integral at the base portion of the lantern firmly secured by means of strong clips and stainless steel mounting screws.

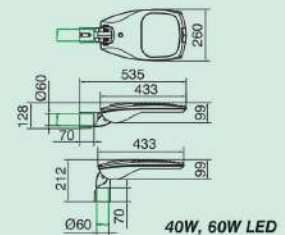

This lantern is supplied in standard dark grey finish (RAL 7026).
