# WALL MOUNT ePoster

A versatile wall-mounted e-poster solution by Delight, designed to help businesses communicate more effectively and connect with customers. It combines the look of printed posters with the flexibility of digital technology, delivering a clean, paper-like display that fits seamlessly into modern environments.

**Innovative • Seamless • Smart • Sustainable**

# WALL MOUNT ePoster

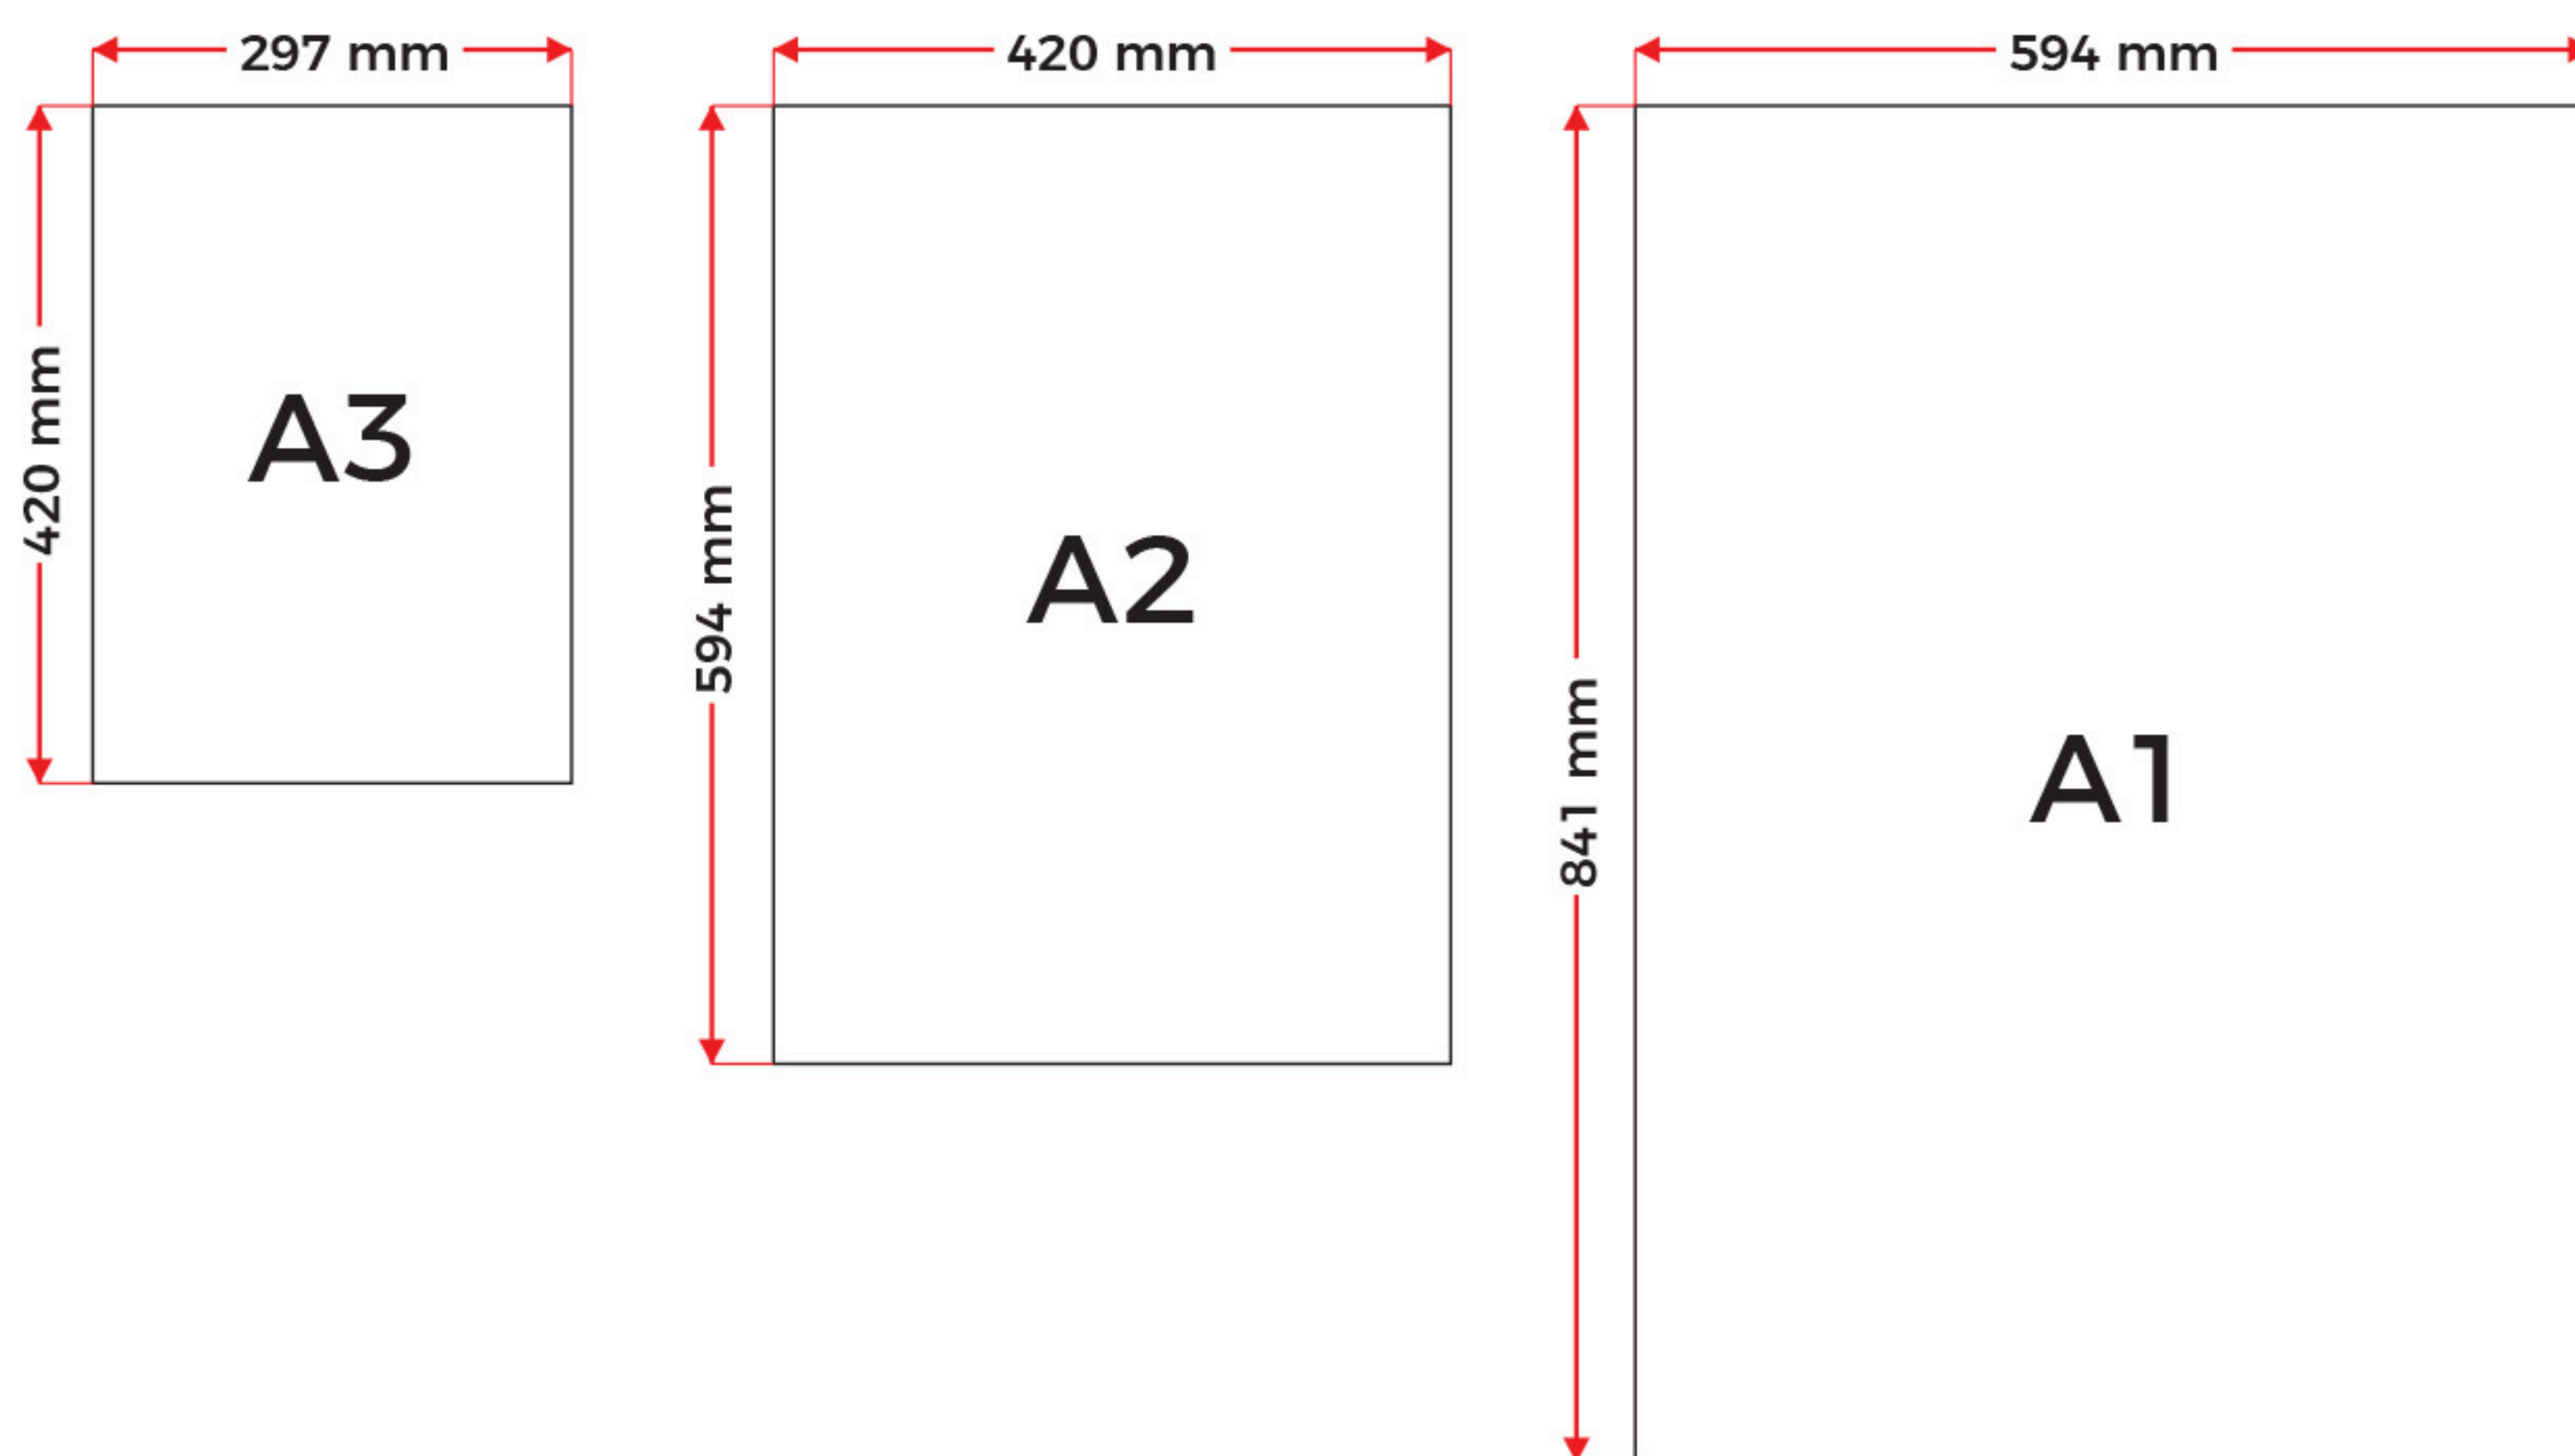

A sleek and versatile wall-mounted ePaper display designed to communicate information clearly and effectively. With its slim design and paper-like screen, it blends easily into different environments while delivering sharp and easy-to-read content.

Ideal for retail stores and supermarkets, it can be mounted on walls to display promotions, prices, and product details helping attract customer attention and improve the overall shopping experience.

Content can be updated remotely through a centralized platform, making it easy to manage multiple displays and keep information consistent and up to date across locations.

As a battery powered wireless solution, it is quick to install without complicated wiring, offering a clean and practical alternative to traditional printed posters.

Available in A1, A2 and A3 sizes to suit different spaces and display needs.

## TECHNOLOGY

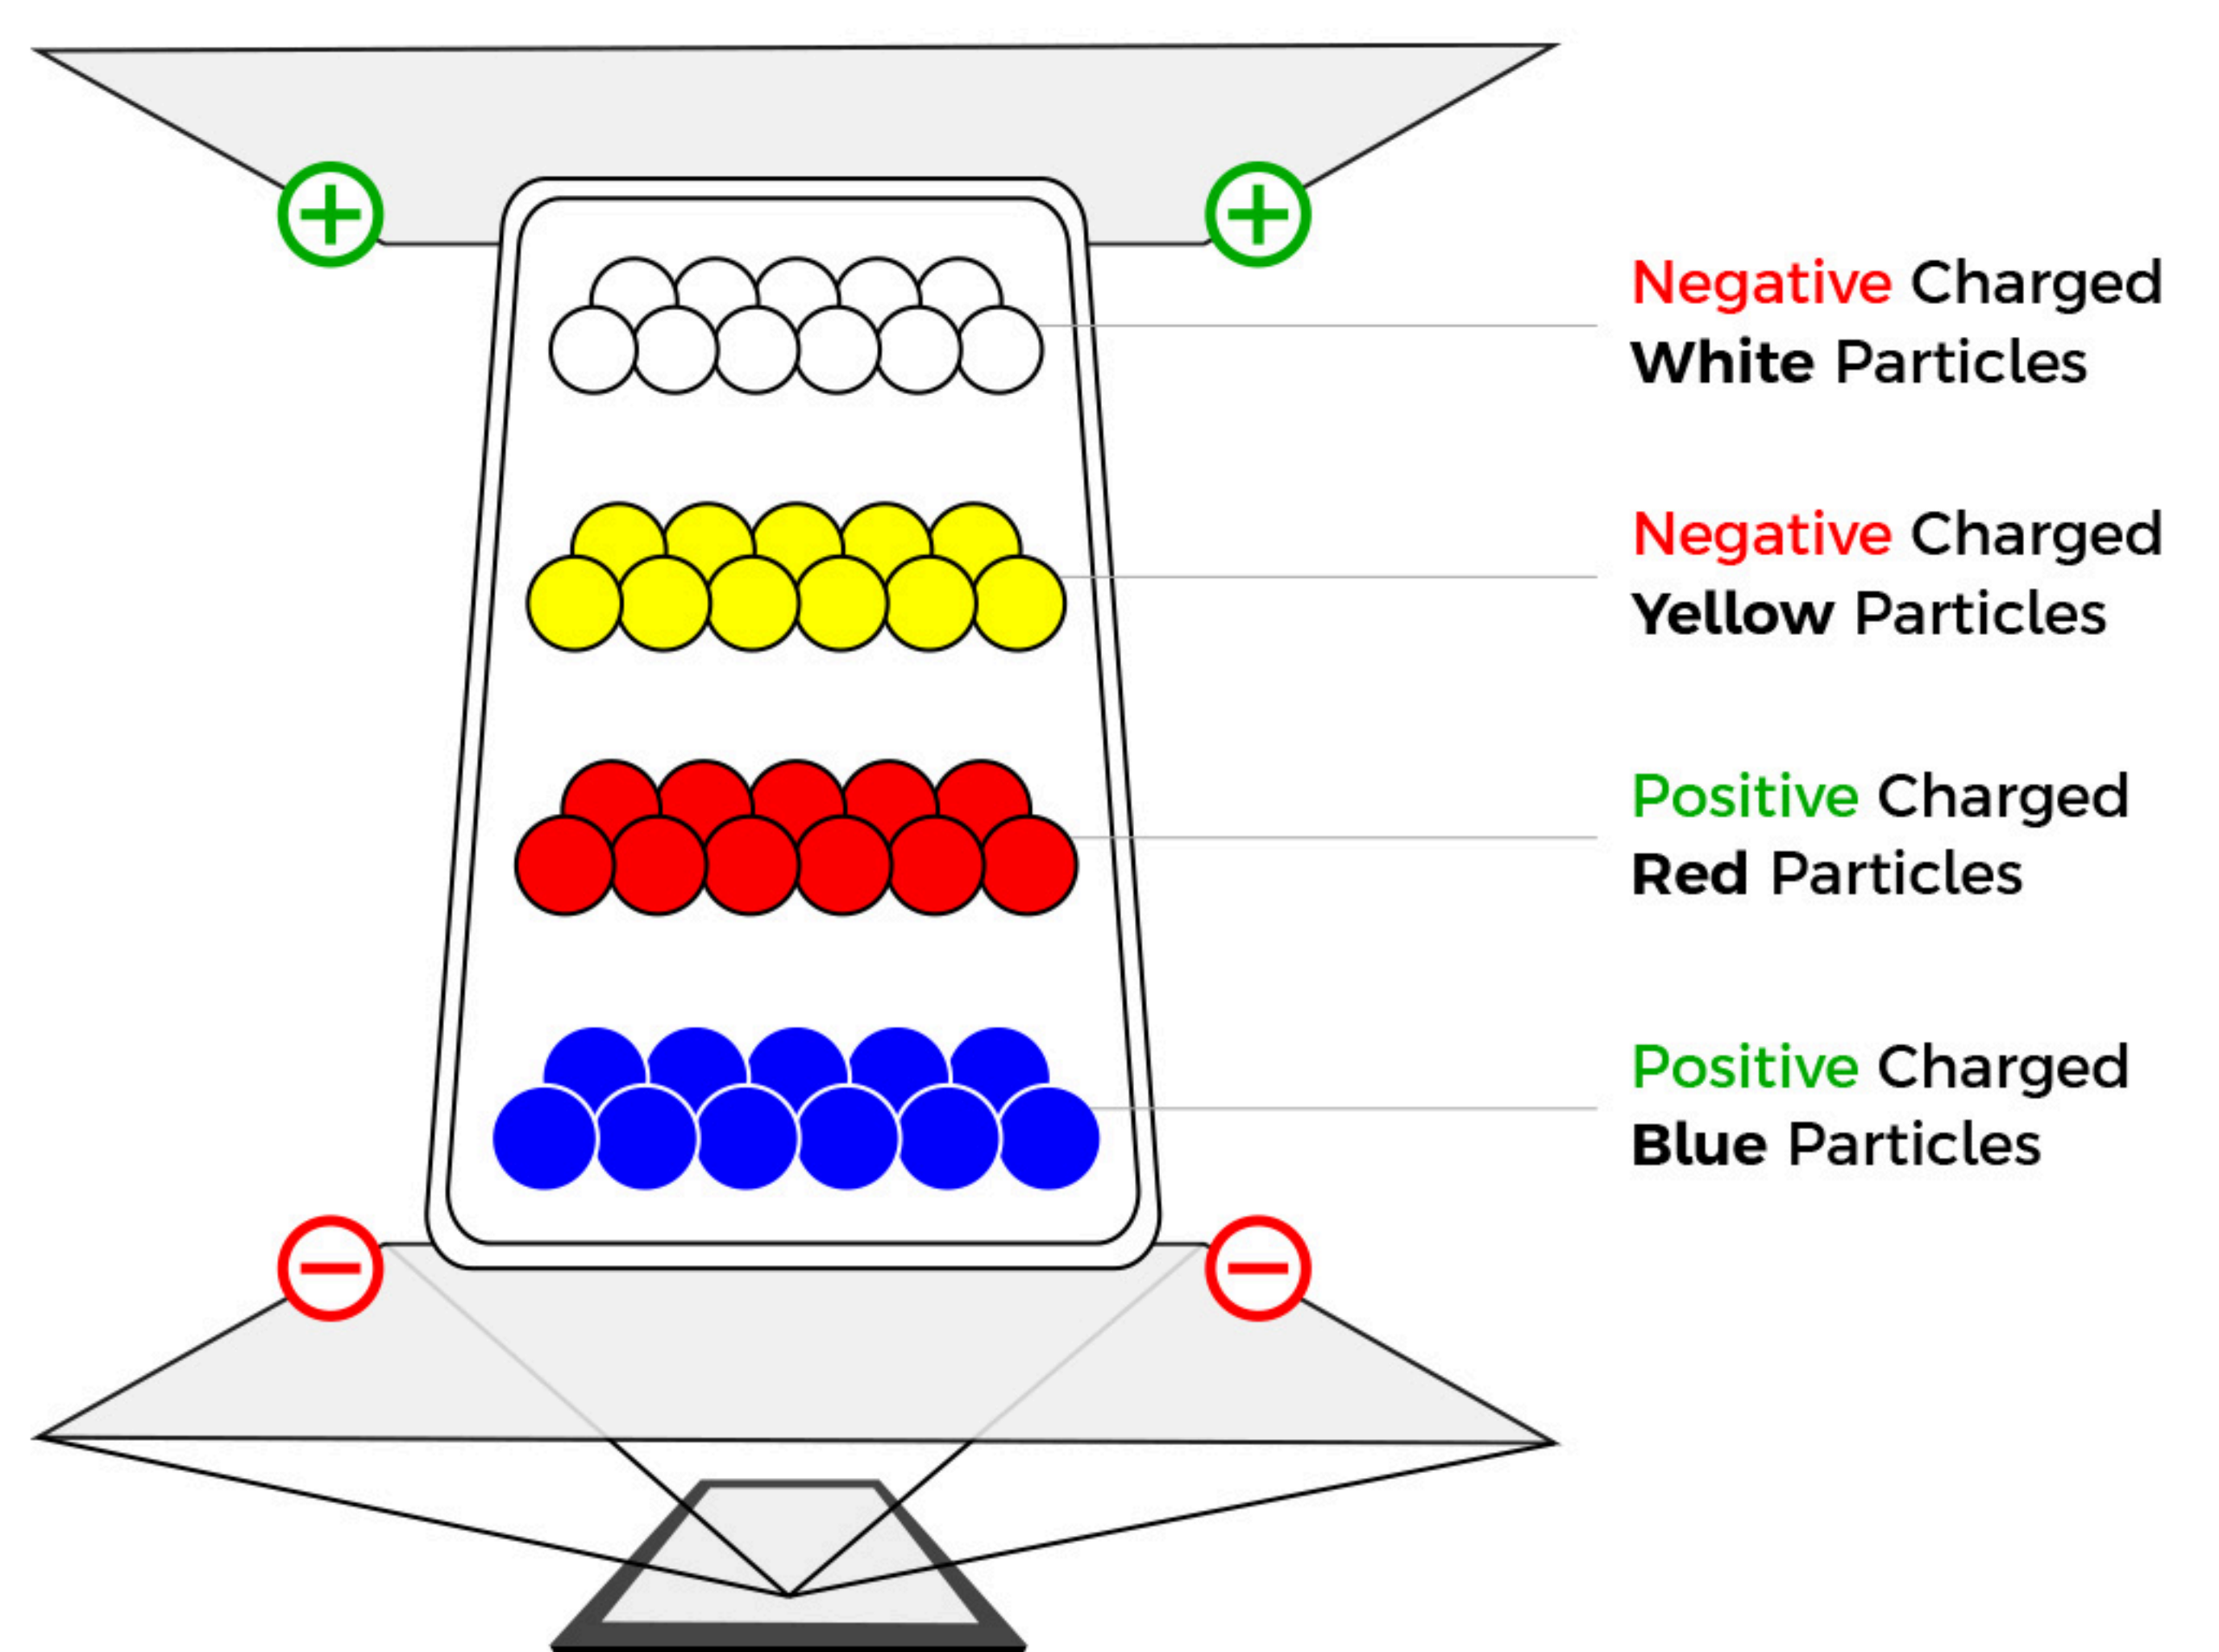

Colour E Ink technology delivers a natural, paper-like display experience designed for modern digital signage. Unlike conventional LCD or LED screens, it does not use a backlight. Instead, it reflects ambient light, ensuring excellent visibility in both indoor and outdoor environments, including direct sunlight.

The display operates using electrically charged color pigments that form images on the screen. Once content is displayed, it remains visible without continuous power, requiring energy only when updates are made.

With no backlight, the display produces no glare, no light emission and no eye strain, offering a comfortable and natural viewing experience like reading from paper.

This makes ePaper an energy-efficient, sustainable and reliable solution for businesses looking to replace traditional printed materials with dynamic digital displays.

E Ink technology reduces operational costs while improving readability and visual comfort, making it ideal for long-term use in retail, healthcare, corporate and hospitality environments.
